35 - 44	21	28.77%
45 - 54	12	16.44%
55 - 64	8	10.96%

The FIT Program (Activating August 2017)

FSL Danbury will be the first institution to introduce the FIT (Female Integrated Treatment) Program. This will be the BOP's first ever programming facility, where the entire FSL is considered a therapeutic community including a Residential Drug Abuse Program, a Mental Health Step Down Program, a Resolve Program (trauma treatment) and a Peer Support Program, and all inmates housed there are involved in some aspect of treatment.

This innovative approach will ensure female inmates receive treatment, addressing the full range of their needs from substance abuse to mental health to trauma, with an integrated, individualized treatment plan and a team of treatment providers to provide collaborative treatment. Once fully activated, the FIT Program will be staffed with 3 Psychologists and 4 Treatment Specialists for approximately 200 inmates. This will offer female inmates a unique, evidence based, integrated treatment community to help foster change and assist with their reentry into the community.
